SUMMARY

A web developer who is driven by curiosity and passion to learn new things and to further improve his skills. I would like to use my technical knowledge to help people and organisations. I have already got acquainted with few important technologies and looking for an opportunity to prove my worth in an organisation.

PROJECTS

Ecommerce Webapp

- Developed a modern Ecommerce application using Node JS,Express,Mongo DB.Routes for webpages are created using express,templates to render the webpages are created using EJS. Authentication is implemented using passport Js library . This application can be used as a basis for building large ecommerce Websites
- This application is deployed at **shop-cart-app.herokuapp.com**

Snake Game

- A simple snake game is designed using canvas API and Javascript .This involves concept of initializing game first and gameloop,which draw and update the game for every fixed interval of time
- The game is deployed at **https://ashishkatakam.github.io/SnakeGame/**

Weather App

- An user friendly weather application is created using vanilla Javascript,HTML and CSS. In this application, fetch API is used to send request to the respected API server
- The application is deployed at **https://ashishkatakam.github.io/Weather-App/**

Portfolio

- A personal portfolio is designed using JQuery,HTML,CSS and Java Script. It can be used as a template to use as a blueprint for designing portfolios.
- It is deployed at **https://ashishkatakam.github.io/Portfolio/**
